## INTERNATIONAL SEARCH REPORT

A. CLASSIFICATION OF SUBJECT MATTER Int.Cl <sup>7</sup> C12N15/09, C12N1/15, C12N9/26							
According to International Patent Classification (IPC) or to both national classification and IPC							
B. FIELDS SEARCHED							
Int.	ocumentation searched (classification system followed b	/26					
	ion searched other than minimum documentation to the		_				
WPI(	ata base consulted during the international search (name DIALOG), BIOSIS (DIALOG), JSTplu ank/EMBL/DDBJ/GeneSeq, SwissPro	ıs(JOIS),	rch terms used)				
C. DOCUM	ENTS CONSIDERED TO BE RELEVANT						
Category*	Citation of document, with indication, where app		Relevant to claim No.				
х/ч	JP 9-009968 A (OZEKI CORP.), 14 January, 1997 (14.01.97), Full text (Family: none)		1,3,4,15-19/ 2,5-14				
Y	PETERSEN, KL. et al., Overexp disulfide is omerase in Asper Microbiol., (2000), Vol.41, N	2,5-14					
Y	TANI, S. et al., A novel nuclear factor, SREB, binds to a cis-acting element, SRE, required for inducible expression of the Aspergillus oryzae Taka-amylase A gene in A. nidulans., Mol Gen Genet., (2000), Vol.263, No.2, pages 232 to 238		2,5-14				
Further documents are listed in the continuation of Box C. See patent family annex.							
"A" docum considered "E" earlier date "L" docum cited to special "O" docum means "P" docum than the	ll categories of cited documents:  tent defining the general state of the art which is not d to be of particular relevance document but published on or after the international filing tent which may throw doubts on priority claim(s) or which is o establish the publication date of another citation or other I reason (as specified) tent referring to an oral disclosure, use, exhibition or other tent published prior to the international filing date but later the priority date claimed actual completion of the international search August, 2003 (06.08.03)	aT" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art document member of the same patent family  Date of mailing of the international search report  12 August, 2003 (12.08.03)					
Name and mailing address of the ISA/ Japanese Patent Office		Authorized officer					
Faccimile No.		Telephone No.
